Have you ever wondered "What is it in life that connects each and every one of us?"

Now, I know there are cliques and trendsetters that play a crucial role in labeling each of us to fit some sort of mold, but deep down...regardless of what you look like, how you dress, or what belief system you follow (if you even do follow any) there is something that bonds us together as one: it is our sixth sense. This is something we all have, yet some just choose to ignore it or not tap into it. Now, I get it, for all of you skeptics out there-- some of you may feel

that intuition and being psychic is all "hocus pocus"...but in reality? You too have already been there. As children--and even into our adult lives--we all experience this deeper sense of 'knowing' and believing in something we cannot grab hold of with our ordinary five senses. Whether it is as whimsical as taking a childhood hobby and following that gut instinct to manifest it into a business, or if it is something as relevant as true love, knowing deep down that you will find your soulmate, we have all experienced that sense of "knowing without knowing how we know it."

There are two females in this

world today, Linda and Terry Jamison, who share a special twin connection which they have termed "Twintuition." They tap into their sixth sense and have blown everyone away with their scores of documented world predictions, and personal readings that have been recorded and featured throughout hundreds of other media sources. Terry and Linda say that they are from the angelic realm of "ONE" and this unearthly realm is where they channel their information from with the help of their spirit guides.

One of their most memorable predictions was of the 9/11 terrorist attacks on The World

Trade Center. Years before 9/11, back in 1999 they predicted these tragic events to over 20 million listeners on the Art Bell Radio Show. During an interview with the world renowned host, Terry and Linda explained in detail what they had seen and written down through their own unique process called automatic writing. They expressed that there was going to be a terrorist attack on the Pentagon and that there were

going to be simultaneous terrorist attacks on the New York World Trade Center Towers and on federal buildings in Washington D.C. by 2002. You can still listen to the tape of this interview as it is available from the archives of Premier Radio Network.

While what the twins possess is a rare talent or gift, Linda and Terry are very adamant about making sure everyone realizes that intuition is a gift we all have, and that

this universe we live in is limitless. Each one of us has a unique way of accessing this realm of information or communicating with our spirit guides. The Psychic Twins dive deep into explaining exactly how you too can connect with your soul, spirit guides and higher self using the exercises described in their #1 bestselling book *Psychic Intelligence*.

Q & A

MOTOVADED: The two of you work, play and live together. What are some things you enjoy individually?

PSYCHIC TWIN, TERRY JAMISON: We're always creating something. Linda might go off and design a new costume, paint or work on a cartoon while I will be writing our new book. Other times, I will be painting while Linda is writing. We both are professional artists. We come from an artistic background... our father is one of the best watercolor painters in the world; his name is Philip Jamison and at 89 years old, he still paints.

MOTOVADED: Have both of you ever had an Out of Body Experience together? (Best known as an OBE).

THE PSYCHIC TWINS: Probably in dream state when we travel together in astral travel, but not while we are conscious. When we do 'psychic work' we are in a conscious trance meaning we are channeling, but we are conscious of what we are saying or writing; we are not out cold or in a sleep state like Edgar Cayce was when he channeled his health readings. We are fully aware. We connect with our spirit guides or through our souls via the Akashic Records. We access information fields called the Akasha, a sort of cosmic library or collective storehouse of knowledge, that encircles the planet and contains all historical thought, word and deed. That is what we are accessing when we tune in to past events as well as to predict the future. We feel we are contacting dimensions of information that are not of this Earth...it is on a cosmic level.

MOTOVADED: How would you advise someone to best get rid of their past life karma that they bring with them into this life?

THE PSYCHIC TWINS: It is interesting. We have been Buddhists for the past 30 years and are just celebrating 30 years of chanting Nam Myoho Renge Kyo (pronounced Nahm-meeyo-ho-ren-gay-keeyo) every day and we believe that is probably the most effective way we have found to change our past life Karma. We don't think anyone can do it for you. Only you hold the power to change your karma and destiny. Although it isn't easy to do we feel like you can to a certain extent clear or mitigate your past negative karma. However, there are certain things you have to live through for the purpose of your soul growth and evolution.

MOTOVADED: What do you feel your purpose is here in this lifetime?

THE PSYCHIC TWINS: In a nutshell, we are pioneering the next frontier of consciousness and our intention really is to raise the world view of psychics and psychic abilities, and destigmatize psychic abilities. You know, psychics, mediums and healers have been persecuted and demonized over so many centuries and we talk about that in our book as well. We have predicted the future and have shown proof of that over 800 times, especially with some of the biggest world events. And you know, the people that are skeptical along with the media, they have an agenda. They haven't looked at our track record. It is impossible to be skeptical when you have seen our track record of world predictions that all happened. It is kind of like Columbus...he proved the world was not flat and people did not like it. He shattered their long-held beliefs about the world being flat, and the two of us are challenging these entrenched beliefs and paradigms about what is possible. We feel we are here to not only prove the ability but the purpose of our prophecy work is to expand people's vision of what is possible, to help people and to warn them to take action about impending events. We feel it is our mission to do this work. It is not like we had a choice; it is our calling. Psychic intelligence is important to the survival of society and to success in general in one's own life. I believe we are leading a revolution in consciousness. We are spearheading a new age of intelligence.
